cosmicsid004

Summary

Fourth-year Computer Science student with a systems-level engineering stack spanning Swift, Rust, and Python. Experience includes shipping iOS applications with live backends and interning on a B2B iOS product in an Agile/Scrum environment. Focused on on-device AI, embedded systems, and building deep-tech solutions for India-specific infrastructure problems.

Education

Galgotias University
B.Tech, Computer Science

Sept 2023 – Aug 2027

- CGPA: 8.72 / 10.0

Class XII, CBSE

2022

- Score: 80%

Class X, CBSE

2020

- Score: 86.4%

Skills

Languages: Python, Java, Swift, Rust

Frameworks & Platforms: SwiftUI, Xcode, Supabase

Tools: Git, Linux, Figma, Android Studio, VS Code, Jira, RaspberryPi, Node MCU

Competitive Programming: 650+ problems solved, 1650+ contest rating

LeetCode

Projects

CosmicLang

CosmicLang

- Designed and implemented a custom programming language from scratch to explore and demonstrate core compiler design principles end to end.
- Built a lexer to tokenize source input, a parser to construct an abstract syntax tree, and a tree-walking interpreter to evaluate expressions and control flow.
- Handled variable bindings, arithmetic and logical operations, and error reporting, resulting in a working language capable of running non-trivial scripts.
- Tools Used: Rust

Logic Hoot

Logic Hoot

- Built and published an iOS app that teaches digital logic design through interactive simulations and hands-on circuit building, live on the App Store.
- Developed dedicated modules for logic gates, adders, and latches, along with a guided circuit playground that lets users build and test circuits directly.
- Integrated an on-device AI assistant for real-time doubt resolution, keeping the learning loop interactive without relying on a network connection.
- Tools Used: SwiftUI, Xcode

Experience

iOS Development Intern

2025

Infosys, Mysore

- Worked as an iOS Development Intern on a B2B product, building and maintaining features using Swift, SwiftUI, and other Apple technologies.
 - Operated within an Agile/Scrum team, participating in sprint planning, stand-ups, and reviews, and tracking work through Jira.
 - Collaborated with cross-functional team members to translate client requirements into functioning iOS features.
-
